Joel Rodríguez

Full-Stack Developer · Saltillo, México

joel@joelrdz.com

Summary

Full-stack developer with **10 years of experience** building web applications, from frontend architecture and component libraries to backend services and relational databases. Led frontend development for 5 years at a research-services company, then spent 5 years at a remote software agency — first as Frontend Lead for a fintech lending platform, later as Full-Stack Developer (PHP/Symfony) on 8 projects, most of them for a major US hotel management company. Currently working as an independent consultant building modern full-stack systems with Next.js, TypeScript, and Supabase, with heavy use of AI-assisted development workflows (Claude Code, AI agents, automation pipelines).

Experience

Independent Software Consultant — FixerJoe

May 2026 – Present · Saltillo, México

- Designed and built the core of a **B2B internal ordering portal** (simplified ERP) for a multi-branch coffee company: product catalog, role-based ordering workflow and order review.
- Stack: **Next.js 16 (App Router), TypeScript, Supabase (PostgreSQL + Row Level Security), Tailwind CSS, shadcn/ui, Vercel**.
- Implemented role-based authentication and authorization across four user roles, enforced at the database level with RLS policies.
- Mapped the client's real-world operations (5 interconnected spreadsheets, 5 stakeholders) into a relational data model and phased delivery plan.

Angle — Software Agency

2021 – May 2026 · Remote

Full-Stack Developer · *2023 – 2026*

- Delivered features across **8 projects**: for a major US hotel management company, a management-agreement and billing system integrated with the **JD Edwards ERP**, a hotel inspection platform and digital-concierge sites for two resorts; plus two Mexican e-invoicing (CFDI) systems, a platform for another client and the agency's own products.
- Built bulk contract updates via CSV import/export and billing-calculation logs for the ERP import, and ported the job scheduler (config, logs, monitor) to the two e-invoicing systems.
- Upgraded a production system to **Symfony 7 and PHP 8.4** with a new admin UI in 1–2 weeks, planned as a spec and executed with **AI coding agents**; upgraded another app from Symfony 4 to 7.4 the same way.
- Moved two resort concierge sites from manual edits to a **Strapi** CMS, so the client edits its own content.
- Built and consumed REST APIs, worked with relational databases (SQL), and collaborated in fully remote, English-documented codebases.
- Stack: **PHP, Symfony, SQL, Git**.

Frontend Lead — Alprestamo · *2021 – 2023*

- Led frontend development for **Alprestamo**, an Argentine fintech lending platform, building the product with **React and TypeScript**.

Frontend Lead — Reprints Desk

2016 – 2021

- Led frontend development for the company's web applications, with **Vue** as the primary framework.
- Built the company's **component library** on Bootstrap 3/4, with a custom theme and new components, and core application functionality in JavaScript.
- Led the frontend migration from **AngularJS to Vue**.
- Stack: **HTML, CSS, JavaScript, Vue, AngularJS, Bootstrap**.

Technical Skills

- **Languages:** TypeScript, JavaScript, PHP, SQL, HTML/CSS

- **Frontend:** React, Next.js (App Router, Server Components, Server Actions), React Native, Vue, Tailwind CSS, shadcn/ui, styled-components
- **Backend & Data:** Symfony, Strapi, Supabase, PostgreSQL (schema design, migrations, Row Level Security), REST APIs
- **Tooling & DevOps:** Git, pnpm, Biome, Vercel, CI/CD basics
- **AI & Automation:** Claude Code, Claude API (prompt design, tool use), AI agent design and orchestration, n8n automation workflows

---

Languages

- **Spanish** — Native
- **English** — Professional working proficiency (daily use: documentation, code, remote work with US clients)

Education

Tecnológico de Monterrey — B.S. in Business and Information Technology Engineering *(Ingeniería en Negocios y Tecnologías de Información)* · 2011 – 2015
